The **UNEP World Conservation Monitoring Centre** (UNEP-WCMC) is the biodiversity assessment and policy implementation arm of the United Nations Environment Programme, the world's foremost intergovernmental environmental organization. UNEP-WCMC aims to help decision-makers recognize the value of biodiversity to people everywhere, and to apply this knowledge in all that they do. The Centre's challenge is to transform complex data into policy-relevant information, to build tools and systems for analysis and integration of these data, and to support the needs of nations and the international community as they engage in joint programmes of action.

El **PNUMA Centro de Monitoreo de la Conservación Mundial** (UNEP-WCMC) es el brazo del Programa de las Naciones Unidas del Medio Ambiente, la principal organización intergubernamental ambiental en el mundo, encargado de evaluar la biodiversidad y la implementación de políticas ambientales. El UNEP-WCMC aspira a ayudar a tomadores de decisiones a reconocer el valor de la biodiversidad para la gente de todo el mundo, y a aplicar este conocimiento en todo lo que hacen. El desafío del Centro es transformar datos complejos en información relevante para las formulación de políticas de gestión, desarrollar instrumentos y sistemas para el análisis y la integración de esos datos, y apoyar las necesidades de las naciones y de la comunidad internacional en general en sus esfuerzos por desarrollar programas de acción conjunta.

Le **PNUE Centre de Surveillance Continue pour la Conservation de la Nature Mondiale** (UNEP-WCMC) est l'agence chargée de l'évaluation de la diversité biologique et de la mise en oeuvre des directives du Programme des Nations Unies pour l'Environnement, la principale organisation intergouvernementale environnementale au monde. Le Centre aspire à aider les gouvernements à reconnaître l'importance de la diversité biologique pour les êtres humains du monde entier et à appliquer cette connaissance à toutes leurs activités. Le défi du Centre consiste à transformer et simplifier des données complexes en informations pertinentes afin de trouver des outils et d'établir des systèmes permettant leur intégration et leur analyse dans la politique de tous les jours. Le Centre vise à appuyer les besoins des nations et de la communauté internationale dans leurs activités et programmes communs environnementaux.

Avant-propos

Cette édition de la *Liste des espèces CITES* intègre les amendements aux annexes CITES et les changements de nomenclature adoptés à la 12e session de la Conférence des Parties à la CITES (Santiago, 2002).

A sa 12e session, la Conférence des Parties a adopté la Liste et ses mises à jour acceptées par le Comité de la nomenclature comme nomenclature normalisée des noms des espèces inscrites aux annexes CITES. Nous sommes très reconnaissants au PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC) de s'être de nouveau attelé à cette tâche; nous adressons des remerciements particuliers au personnel qui a été chargé de ce travail méticuleux.

Les frais de préparation et de production de la Liste ont été pris en charge par la Commission européenne, le *Joint Nature Conservation Committee* (Royaume-Uni) et le PNUE-WCMC, ainsi que par le Secrétariat CITES; nous remercions vivement nos partenaires pour leur importante contribution.

Nous savons que la Liste des espèces CITES est largement utilisée et très appréciée par les organes de gestion, les autorités scientifiques, les douanes et les personnes impliquées dans la mise en œuvre de la CITES, ainsi que par les organisations non gouvernementales, les scientifiques, la presse et autres entités. Nous sommes par ailleurs conscients que nous devons continuer de nous adapter aux besoins nouveaux des utilisateurs de ce guide. C'est pour cette raison, entre autres, que nous souhaitons connaître les réactions et les suggestions des utilisateurs de cet ouvrage sur la manière dont nous pourrions l'améliorer à l'avenir.

Remerciements

Cette publication a été préparée au nom du Secrétariat CITES par le PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC). Elle a été revue et corrigée par Tim Inskipp et Harriet Gillett avec l'assistance d'Alice Davies et de Joan Field et l'appui technique de James O'Carroll, Paul Birrel et Phill Fox. Gerardo Fragoso a géré le projet.

L'équipe chargée de la production de la Liste est très reconnaissance au personnel du Secrétariat CITES pour ses conseils et son assistance. Le PNUE-WCMC remercie également la Commission européenne pour son appui financier et le *Joint Nature Conservation Committee*, du Royaume-Uni, qui a rendu possible la production de ce livre et de son CD-ROM.

Introduction

Faune et flore CITES

Ce livre et son CD-ROM donnent la liste des espèces animales et végétales inscrites aux Annexes I, II et III de la CITES adoptée par la Conférence des Parties et valable à compter du 13 février 2003. Le CD-ROM inclut aussi les annexes annotées comportant un index des noms des familles et des noms communs en anglais. Les compilateurs espèrent qu'ils seront utiles au personnel des organes de gestion et des autorités scientifiques, ainsi qu'aux douaniers et à toutes les personnes chargées d'appliquer la Convention ou de la faire respecter.

Remarque générale

Les noms utilisés dans les annexes CITES sont les noms scientifiques acceptés par le Comité CITES de la nomenclature. Les noms communs figurant dans la Liste des espèces CITES et annexes et réserves CITES annotées sont donnés pour référence. Si l'utilisateur ne trouve pas le nom commun d'une plante ou d'un animal couvert par la CITES, il devra le rechercher sous son nom scientifique ou sous un autre nom commun.

Les espèces figurant dans la Liste des espèces CITES et annexes et réserves CITES annotées sont indiquées:

a) par le nom de l'espèce; ou
b) par l'ensemble des espèces appartenant à un taxon supérieur ou à une partie désignée dudit taxon.

Les autres références à des taxons supérieurs à l'espèce sont données uniquement à titre d'information ou à des fins de classification.

Le lecteur trouvera d'autres détails concernant chaque taxon, comme le nom de l'auteur et la répartition géographique, sur le site officiel de la CITES: http://www.cites.org

Liste des espèces CITES

La Liste des espèces CITES comprend une liste alphabétique d'espèces animales et une liste alphabétique d'espèces végétales. Il y a trois types d'entrées: le nom scientifique, le nom commun et le synonyme scientifique. Noms communs et synonymes renvoient aux noms scientifiques, où figurent les informations CITES.

Nom scientifique

La Liste contient, dans l'ordre alphabétique, tous les taxons animaux et végétaux inscrits aux annexes CITES – à l'exception des orchidées de l'Annexe II, pour lesquelles seul le nom du genre est inscrit – *Cattleya* spp., par exemple.

Présentation
1) Nom scientifique
2) Noms communs en anglais (E), en espagnol (S) et en français (F), s'ils sont connus;

3) Symbole #1 à #8 s'il y a lieu (Voir *Interprétation* ci-dessous);

4) Annexe(s) I, II, III, auxquelles l'espèce est inscrite, ou "NC" pour signaler les taxons partiellement inscrits ou non inscrits aux annexes CITES[1]. Certains taxons font l'objet d'une inscription scindée; cela signifie qu'ils sont inscrits en partie à une annexe et en partie à une autre. Lorsqu'un taxon est inscrit à la fois à l'Annexe I et à l'Annexe II, par exemple, il est signalé par "I/II". Parfois, seules certaines populations sont inscrites alors que d'autres ne sont pas couvertes par la Convention. Un taxon en partie inscrit à l'Annexe I et en partie non inscrit, par exemple, est signalé par "I/NC".

5) Pour la faune, famille en majuscules et code à deux lettres indiquant la classe à laquelle appartient l'espèce. Les codes suivants sont utilisés:

Ac = Actinopterygii
Am = Amphibia
An = Anthozoa
Ar = Arachnida
Av = Aves
Bi = Bivalvia
El = Elasmobranchii
Ga = Gastropoda
Hi = Hirudinoidea
Hy = Hydrozoa
In = Insecta
Ma = Mammalia
Re = Reptilia
Sa = Sarcopterygii

Exemples *Abeillia abeillei*: (E) Emerald-chinned hummingbird, (S) Colibrí barbiesmeralda, (F) Colibri d'Abeillé **II** TROCHILIDAE Av
Cattleya spp. #7 **I/II** ORCHIDACEAE

Nom commun

Quand ils sont connus, les noms communs en anglais, en espagnol et en français sont donnés pour référence.

Présentation Le nom commun en anglais (E), en espagnol (S) ou en français (F) est suivi du nom scientifique. Il y a une seule entrée pour chaque nom commun: il y en a une pour "Aigle doré" mais pas pour "Doré, Aigle".

Exemples Perroquets (F): PSITTACIFORMES spp.
Slipper orchids (E): *Paphiopedilum* spp., *Phragmipedium* spp.
Colibri d'Abeillé (F): *Abeillia abeillei*

[1] Quelques espèces non inscrites aux annexes CITES ont été incluses pour information: deux espèces de Psittaciformes: *Melopsittacus undulatus* et *Nymphicus hollandicus*, et quatre espèces de Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* et *Coragyps atratus*. Ce sont les seules espèces de ces grands ordres à ne pas être couvertes par la CITES. De même, *Aloe vera* est la seule espèce d'*Aloe* non inscrite aux annexes.

Synonyme scientifique

Certains synonymes de noms scientifiques apparaissent dans la liste mais pas tous.

Présentation Synonyme scientifique suivi de "=" puis du nom scientifique accepté. C'est ce dernier qu'il faut chercher, en suivant l'ordre alphabétique, pour trouver les autres renseignements sur l'espèce.

Exemple *Tirucallia goetzei = Euphorbia goetzei*

Annexes et réserves CITES annotées
(CD-ROM uniquement)

Des informations sont fournies sur tous les taxons actuellement ou antérieurement inscrits aux annexes CITES. La date de l'inscription originale est indiquée pour tous les taxons (ordre, famille, genre, espèce, sous-espèce) et les populations spécifiquement nommés dans les annexes actuelles ou dans des versions antérieures. Toutes les réserves faites par les Parties sont signalées avec la date d'entrée en vigueur et, dans le cas de réserves passées, la date de retrait.

Les informations sont disposées en suivant l'ordre taxonomique et incluent les noms communs pour les taxons supérieurs. Exemple: URSIDAE (ours). Lorsqu'il n'y a qu'une seule ou quelques espèces d'une famille qui sont inscrites, leurs noms communs sont indiqués. Exemple: ESCHRICHTIIDAE (baleine grise). Ces noms communs et noms de famille sont inclus dans l'index.

Remarque: Il y a dans la Liste plus de noms communs d'espèces en anglais, en espagnol et en français donnés au niveau du nom scientifique correspondant et du nom de famille approprié qu'il n'y en a dans les annexes annotées. Pour trouver podocnémide de Duméril, par exemple, consultez d'abord la Liste, où vous trouverez ce nom sous *Peltocephalus dumeriliana*. Cherchez ensuite *Peltocephalus dumeriliana* dans les annexes annotées.

Des informations sont fournies dans les cinq colonnes suivantes: Nom scientifique, Annexe CITES, Code ISO, Dates et Notes, comme suit:

Nom scientifique

Cette colonne donne le nom scientifique des taxons qui sont, ou ont été, inscrits aux annexes. Ces noms peuvent être situés à divers niveaux taxonomiques: ordre, famille, genre, espèce, sous-espèce ou variété. Les ordres et les familles sont donnés dans la même séquence taxonomique que celle utilisée dans les annexes CITES. Les espèces (et les sous-espèces) sont indiquées par ordre alphabétique dans chaque famille. Les noms des taxons supérieurs, figurant en caractères gras, sont communiqués pour information.

Annexe CITES

Dans les trois colonnes suivantes figurent la ou les annexes auxquelles les taxons sont ou étaient inscrits. Les réserves faites par les Parties sont signalées en ajoutant "r" au numéro de l'annexe pour indiquer que la réserve est entrée en vigueur, ou "w" pour indiquer qu'elle a été retirée. Si les Annexes I et II sont toutes deux applicables à un taxon à une certaine date, l'Annexe I est indiquée en premier. La mention "Del" remplaçant un numéro d'annexe dans une des trois colonnes signale que le taxon a été supprimé de l'annexe à la date indiquée.

Code ISO

Cette colonne donne le code ISO de toute Partie et de tout territoire mentionné dans le contexte d'une inscription à l'Annexe III, des réserves et des espèces faisant l'objet d'une inscription scindée ou partielle.

Dates

Cette colonne donne les dates d'entrée en vigueur des changements survenus dans les annexes concernant l'espèce en question. Les dates sont indiquées dans l'ordre chronologique (jour/mois/année; exemple: 01/07/75 = 1er juillet 1975), la date la plus ancienne étant citée la première. Les inscriptions ultérieures d'un taxon ou d'une population figurent aux lignes suivantes. Lorsque les populations d'un taxon sont scindées entre l'Annexe I et l'Annexe II, les deux annexes sont indiquées après chaque date à laquelle un changement a eu lieu, avec des notes indiquant le statut de toutes les populations à chaque annexe.

Notes

La dernière colonne contient toute information supplémentaire, par exemple sur les changements et la situation après chaque changement. Pour les populations isolées, le déroulement des faits est indiqué de manière que tout changement d'annexe peut être repéré en lisant les lignes se référant à chaque changement. Les références aux populations sont indiquées par le code ISO à deux lettres des pays ou territoires (voir plus haut). D'autres notes donnent des informations complémentaires sur les taxons inscrits (synonymes scientifiques, par exemple). Les mots "inclus dans..." indiquent que le taxon a d'abord été inscrit séparément puis englobé dans un taxon supérieur. Les mots "inscrit sous..." indiquent que le taxon faisait d'abord partie d'un taxon supérieur inscrit puis a été traité séparément, soit qu'il ait été transféré à une autre annexe, ou qu'il ait fait l'objet d'une réserve.

Voici un exemple: si l'on examine les différentes étapes de l'inscription aux annexes de la population de *Crocodylus niloticus* du Malawi, l'on constate que la première entrée pour cette espèce indique que l'espèce entière (toutes ses populations) a été inscrite à l'Annexe I le 1er juillet 1975. On trouve ensuite, sous cette entrée, un certain nombre d'autres entrées indiquant le transfert de diverses populations de l'Annexe I à l'Annexe II. L'une d'elles signale que la population du Malawi (MW) a été transférée à l'Annexe II le 1er août 1985. Une autre indique que le 18 janvier 1990, un programme d'élevage en ranch d'espèces de l'annexe II a commencé pour cette espèce; la dernière entrée résume la situation actuelle de l'espèce et indique que la population de *C. niloticus* du Malawi élevée en ranch est toujours inscrite à l'Annexe II.

Interprétation

Conformément aux dispositions de l'Article I, paragraphe b, alinéa iii), de la Convention, le signe (#) suivi d'un nombre placé après le nom d'une espèce ou d'un taxon supérieur inscrit à l'Annexe II ou à l'Annexe III sert à désigner des parties ou produits obtenus à partir de cette espèce ou de ce taxon et qui sont mentionnés comme suit aux fins de la Convention:

#1 Sert à désigner toutes les parties et tous les produits, sauf les graines, les spores et le pollen (y compris les pollinies);
- a) les cultures de plantules ou de tissus obtenues in vitro en milieu solide ou liquide et transportées en conteneurs stériles; et
- b) les fleurs coupées des plantes reproduites artificiellement.

#2 Sert à désigner toutes les parties et tous les produits, sauf:
- a) les graines et le pollen;
- b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
- c) les fleurs coupées des plantes reproduites artificiellement; et
- d) les produits chimiques et les produits pharmaceutiques finis.

#3 Sert à désigner les racines entières et tranchées et les parties de racines, à l'exception des parties et produits transformés tels que poudres, pilules, extraits, toniques, tisanes et autres préparations.

#4 Sert à désigner toutes les parties et tous les produits, sauf:
- a) les graines, sauf celles des cactus mexicains provenant du Mexique, et le pollen;
- b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
- c) les fleurs coupées des plantes reproduites artificiellement;
- d) les fruits, et leurs parties et produits, des plantes acclimatées ou reproduites artificiellement; et
- e) les éléments de troncs (raquettes), et leurs parties et produits, de plantes du genre *Opuntia* sous-genre *Opuntia* acclimatées ou reproduites artificiellement.

#5 Sert à désigner les grumes, les bois sciés et les placages.

#6 Sert à désigner les grumes, les bois sciés, les placages et les contreplaqués.

#7 Sert à désigner les grumes, les copeaux et les matériaux déchiquetés non transformés.

#8 Sert à désigner toutes les parties et tous les produits, sauf:
- a) les graines et le pollen (y compris les pollinies);
- b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
- c) les fleurs coupées des plantes reproduites artificiellement; et
- d) les fruits, et leurs parties et produits, de plantes du genre *Vanilla* reproduites artificiellement.

Nomenclature et taxonomie

La nomenclature et la taxonomie suivies ici sont celles utilisées dans les annexes CITES. Dans la plupart des cas où les annexes n'incluent que le nom d'un ordre, d'une famille ou d'un genre, les noms des espèces individuelles de ce taxon supérieur ont été inclus dans la Liste. Lorsqu'une référence normalisée a été adoptée par le Comité de la nomenclature [CoP12 Doc. 10.3 (Rev. 1) Annexe 3], les noms de ces espèces sont ceux utilisés dans les publications pertinentes signalées ci-dessous. Toutefois, les listes d'espèces ne sont pas incluses pour Orchidaceae spp. figurant à l'Annexe II; ces noms au niveau de l'espèce ou à un niveau inférieur peuvent être trouvés en consultant les Listes CITES des Orchidaceae (Roberts *et al.* 1995, 1997, 2001). Lorsqu'aucune référence normalisée n'a été adoptée (comme signalé ci-dessous aux endroits appropriés) les noms d'espèces de taxons supérieurs sont ceux actuellement utilisés dans la base de données du PNUE-WCMC et proviennent de diverses publications.

La Conférence des Parties à la CITES a adopté cette Liste comme référence normalisée pour les espèces inscrites aux annexes dans la mesure où elle a été acceptée par le Comité de la nomenclature. Il convient donc de noter que le Comité de la nomenclature n'a accepté que les noms scientifiques des espèces figurant ci-après dans les références normalisées. Les deux références relatives aux invertébrés n'ont pas été adoptées comme références normalisées; elles ont été incluses ici pour information.

Comment utiliser la version pdf de la *Liste des espèces CITES* et des *Annexes et réserves CITES annotées*

Comment accéder au document

Ce CD-ROM se met automatiquement en marche une fois inséré dans votre lecteur de CD-ROM. Cependant, si vous avez fermé le fichier pdf et souhaitez le rouvrir, vous pouvez aller dans le lecteur de CD-ROM sous votre gestionnaire de fichiers et cliquez sur le fichier “open.bat”.

Naviguer dans le document

Pour arriver directement sur la Liste des espèces CITES et des Annexes et réserves CITES annotées sur le CD-ROM, cliquez ci-dessus sur l'hyperlien en bleu ou sur celui figurant au bas de cette page. En cliquant sur l'un ou l'autre de ces deux liens, vous arriverez directement à la table des matières.

Il y a plusieurs manières de naviguer entre les différentes sections.

Premièrement, comme expliqué ci-dessus, vous pouvez utiliser les hyperliens qui apparaissent en bleu dans les diverses tables des matières. Cliquer dessus vous amènera à la section recherchée.

Deuxièmement, il y a au bas de l'écran un compteur de pages qui vous permet d'aller à la page suivante ou précédente, à la page de votre choix, ou encore à la première ou dernière page du fichier. La barre d'outils du haut comporte une série de flèches qui offrent des possibilités de navigation similaires: elles peuvent vous emmener à la page suivante ou précédente, à la dernière page consultée, à la dernière page du document, etc.

Troisièmement, Adobe Acrobat inclut une fonction de recherche. On peut y accéder par le menu déroulant "Edition", en appuyant simultanément sur les touches <Ctrl> et <F>, ou encore en cliquant sur l'icône représentant des jumelles. Tapez les mots recherchés dans la case prévue sous "Rechercher" puis cliquez sur "Rechercher". Adobe Acrobat s'arrêtera sur la première occurrence de ces mots à partir du point de recherche et les mettra en surbrillance. Pour relancer une recherche, il suffit de cliquer du bouton droit sur le document puis de cliquer du bouton gauche sur "Poursuivre la recherche".
